

||| CALIBRE

CALIBRE medical male enhancement is a 1-hour, in-clinic procedure designed to quickly increase penis size without invasive surgery or downtime. Our treatment program and post-care protocols have been established after many hundreds of patient treatments - this is what makes CALIBRE penis enlargement the safest, the most reliable and the best

Who Is Suitable For CALIBRE?

Studies show that up to 60% of men are unsatisfied with the size or appearance of their penis. CALIBRE is suitable for nearly all men who wish to quickly increase their penis girth, without invasive surgery or downtime. Our patients have ranged from 18 to 65+ and most advise that increased penis size enhances their confidence. We can treat both circumcised and uncircumcised men.

You must be over 18 years, have realistic expectations of potential results and not suffering any serious medical conditions. Doctor consultation is essential.

The CALIBRE Procedure

CALIBRE aims to increase girth along the shaft of the penis and may also enlarge the glans. Our Doctors apply cosmetic dermal fillers using a special injection technique, a customized program and refined post-care protocols. The area is numbed and the dermal filler is injected into tissue just below the surface of the skin, which is usually quite comfortable. It takes a couple weeks for the filler to stabilize and look its best after which, the filler slowly metabolizes and is resorbed by the body (from 1-3+ years depending on the product used).

Maximum volume in a single session is 15ml in the shaft and up to 3-5ml in the glans. You may have progressive top-ups until your desired results are achieved, however, your Doctor will recommend an optimal aesthetic treatment program for you.

What Results Can I Expect?

- Your augmentation results will depend on your natural penis size, the product type and the volume of filler injected.
- Our most common 15ML Package often produces a 1" increase in flaccid girth of the shaft, which equates to about 0.5"-0.7" when erect.
- With larger volumes the extra weight tends to increase flaccid length. You will notice less "shrinkage" when cold or embarrassed.
- Partners will notice larger size during intercourse.
- Results do vary between patients.

How Long Will The Results Last?

Our recommended Product 1 (HA) often maintains full size for around 18 months, then slowly resorbs up to 30 months. Small top ups will help maintain full size and repeat sessions tend to last a bit longer. Fortunately, HAs can be rapidly dissolved so any problems (which are uncommon) are reversible. Duration will also depend on factors such as your natural metabolism and medications taken. We can offer longer-lasting Products but they tend to have higher risk profiles.

Confidential Consultation and Program

A Doctor consultation is required at least 1 week prior to procedure to ensure you fully understand the treatment program and all your questions have been answered. It is important to discuss your objectives and have realistic expectations of what CALIBRE penis augmentation can do for you. We encourage you to raise any questions or concerns so these can be resolved prior to your procedure.

Most treatment programs are scheduled over 1-3 sessions a couple weeks apart, depending on the total volume and your unique circumstances. You may also fly in for treatment, generally over 1 week.

How Much Does CALIBRE Cost?

The standard pricing for CALIBRE penis augmentation is based upon the amount and type of product used. The following pricing is for our recommended Product-1:

Packages (Product-1, HA):

Glans Only (3mls):	\$1,950
Silver Package (7mls):	\$4,200
Gold Package (10mls):	\$5,700
Platinum Package (15mls):	\$7,900

Prices for different Products and for larger packages can be quoted during your consultation or on the day of treatment. Further treatments within 4 months of first session will only be charged the incremental fee to the applicable higher package. All patients are entitled to a 10% discount on published rates beyond 4 months from their first treatment session.
